

Snare Enterprise Agents

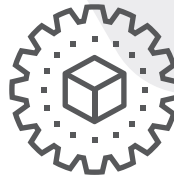

Our Enterprise Agents aren't just the fundamental building blocks of our own log monitoring and management solution, but an established industry standard by companies around the world.

Lightweight, scalable and dependable, Snare Agents collect vast amounts of data and do so with a minimal footprint. Whether you're just getting started or looking to put the finishing touches on your centralized logging solution, Snare is the get-it-done piece of the puzzle.

Centralized Log Collection

- **Log caching** ensures data isn't lost during network interruptions
- Smart TCP confirms log delivery
- Simulcasting enables distribution of logs to **multiple destinations**, in multiple formats and protocols
- TLS/SSL Encryption
- Veracode Verified secure
- Heartbeats assure Agents are operational
- Filtering optimized log and data management

Remote Management

- Agent Management Console enables bulk agent management
- Administrators can remotely monitor changes to the Agent's configuration
- Binary distribution empowers admins to update agents from central location

Integrate with any SIEM

Popular with consultants, MSSPs and in-house security professionals, Snare works in conjunction with nearly every brand of SIEM and Security Analytics software on the planet. You can even link up different SIEMs through Snare.

Lightweight

Deployment Footprint < 10 MB

Host Memory ~ 20 MB

Host Resource <5% CPU

Operating Systems

Windows/Epilog, OSX, Linux,
UNIX, MSSQL, Solaris

File Integrity Monitoring

Detect changes in files, directories or even monitor your registries with RIM – or Registry Integrity Monitoring. FIM and FAM (File Activity Monitoring) are critical parts of any centralized logging solution.

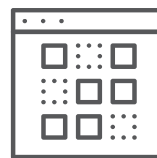

Compliance

Gather the data needed to comply with PCI, SOX, GDPR, HIPAA, NISPOm, PIPEDA and more!

Wide Variety of Formats and Protocols

Our optimized and reliable logging client reduces your deployment risk and resource costs where it counts, your operational servers and workstations. Handling both structured and unstructured data, the Snare Server can be deployed to handle even those most esoteric protocols and formats to keep the load on your collection points lightweight and dependable no matter what they are.

WEC Agents

Collect Windows Forwarded Events remotely before forwarding those on to Snare Central or another third party SIEM – or both! This gives you more flexibility in how you deploy your Snare solution and how you cover your organization's digital infrastructure.
